***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach an input transistor having a gate coupled with a logic signal of the multiple logic signals and a channel coupled between a gate of the second keeper transistor and the high voltage source, as recited in claim 1; the cited prior arts also fail to teach a keeper circuit to pull up the domino node in response to the output when the domino node is at a high voltage and to stop pulling up the domino node before the output circuit outputs the first logical output, as recited in claim 8; and the cited prior arts also fail to teach a method step of supplying charge from a high voltage source to a second node in response to the logic signal, the charge on the second node opening a second path to remove charge from the domino node, as recited in method claim 16.

2. Claims 1-20 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
